My Houseplants.

Hello, my name is Aisha. I am a student of Secondary school. I love studying and reading books. In my free time I grow plants. I water my houseplants and remove dry leaves every day. My sister and I take care of them and we love it. She helps me to take care of my plants. I don't like it when someone touches my flowers. My little brother doesn't understand the importance of all the plants.

I love when there are many flowers in the house. This creates comfort in the house. Every weekend I dust the leaves and pots.

I didn't get my first flower by myself. My relatives gave me my first flower for my 8th birthday. Then I got some from my family and some friends. I bought this beautiful flower called ""Orchid" with my savings. It is an amazing one from all of my collection.
