| 29 | 30 | 31 | | | | |

LIVEWORKSHEETS

**The rules of the game are simple: the teacher chooses a date and names the days before and after it. For example: "Yesterday it was warm, tomorrow it will be sunny. What's the date?"**
**Students should try to find the date according to the descriptions.**

**With this game students can practice such themes as "Weather", "Ordinal Numerals" and "Days of the week".**

**P.S. I made this work according to Russian type of weather in October ☺ If the weather in your country differs from ours feel free to change anything you want (the document is editable)**
