5. Test

Activity 10

Name:

Grade:

Test your final design of a smart greenhouse. Does it meet the basic requirements?

If your smart greenhouse does not meet the requirements, go back and try to fix it. Then, write your results.

Test	Result	
Does the smart greenhouse **store a temperature value** from a **sensor** using a variable?	☐ No	☐ Yes
Does the smart greenhouse **store a light value** from a **sensor** using a variable?	☐ No	☐ Yes
Does the **LED grid** output a **temperature value**?	☐ No	☐ Yes
Does the **LED grid** output a **light value**?	☐ No	☐ Yes

Did you answer "**No**" to any of the testing questions? If so, can you change your design to improve your test score?
