UNIT 1: INTERACTION

SOME VOCABULARY

Bones

Brain

Eyes

Neurons

Skin

Muscles

Skeleton

Taste Buds

Joints

Spinal Cord

Nerves

Nostrils

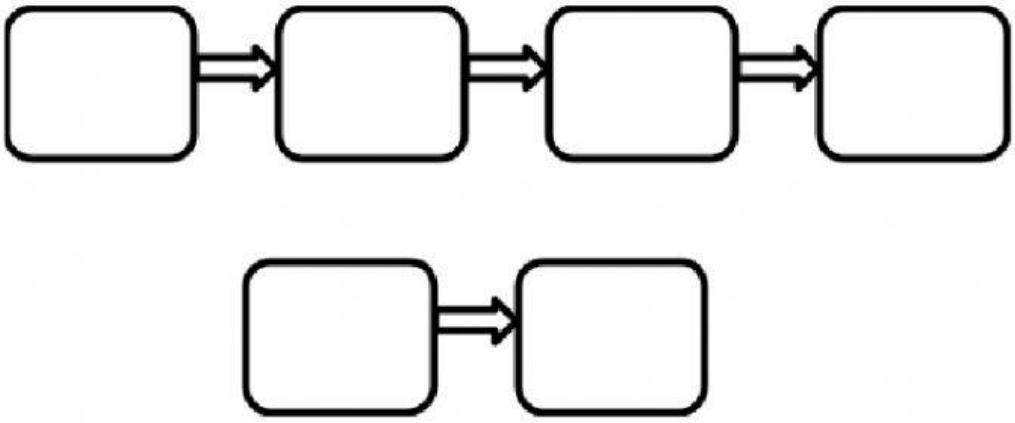
Tongue

LIVEWORKSHEETS

THE NERVOUS SYSTEM

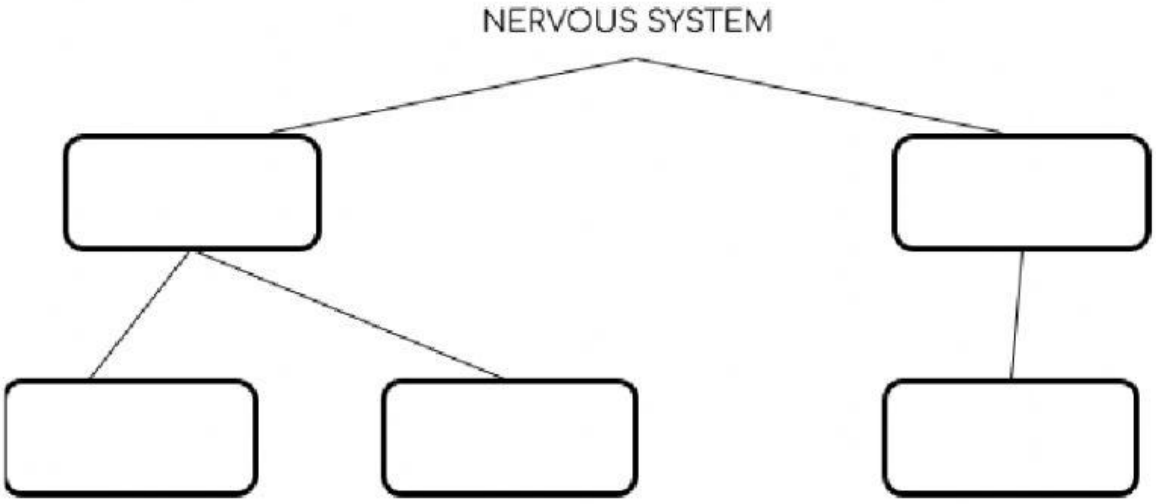
¿CÓMO SE FORMAN LOS CUERPOS DE SISTEMAS? - HOW ARE SYSTEMS BODIES FORMED?

_____ are made up of _____. _____ that make the same function create _____. _____ group together to form _____. _____ that work together form the _____ which make up the bodies of organisms.



¿QUÉ HACE EL SISTEMA NERVIOSO? - WHAT DOES THE NERVOUS SYSTEM DO?

The nervous system sends _____ from the _____ to different parts of the body, with this action we _____ to the stimuli from our _____. It also controls our _____ systems (_____ or _____ systems)



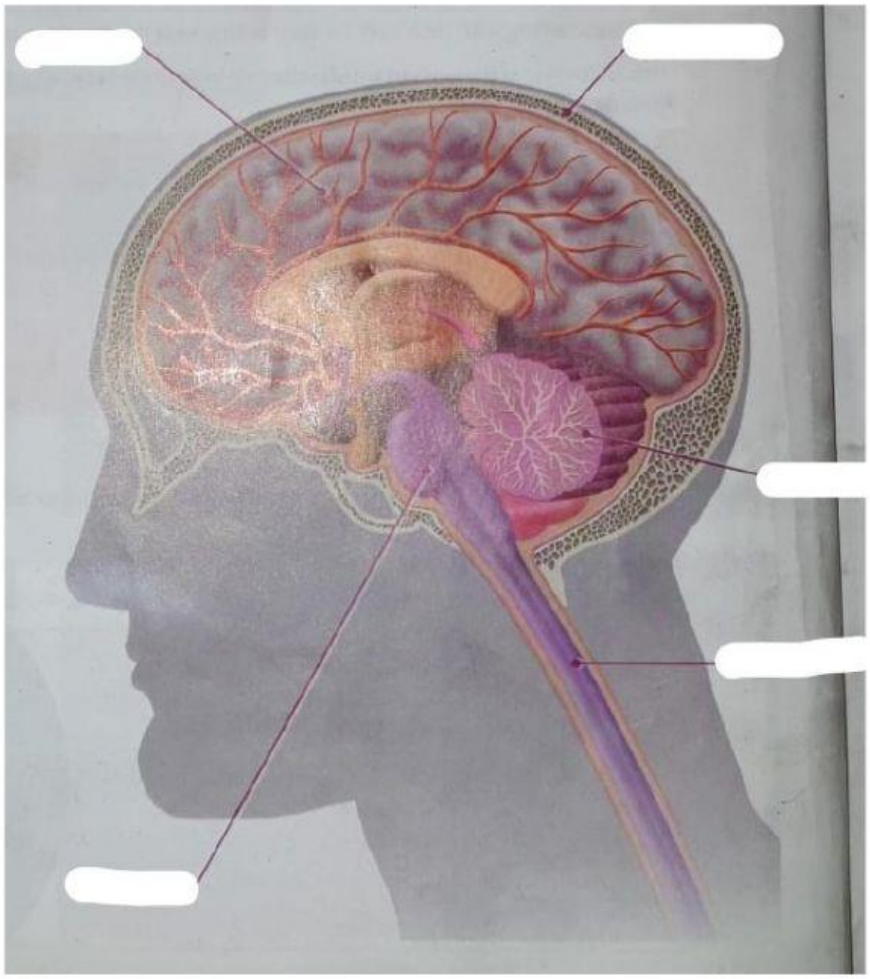
-

LIVEWORKSHEETS

THE CENTRAL NERVOUS SYSTEM

The brain : controls our nervous system. It is protected by the _____ (or cranium). Parts:
1- The _____ is the biggest part. This is where we process the information from our _____. We use it to take _____, to _____ or to _____
2- The cerebellum is controlling our _____, _____ and _____.
3- The _____ _____ is the continuation of the _____ _____. It controls _____ actions (sleep)

The spinal cord : is made up of _____ _____. It controls our _____ actions.



LIVEWORKSHEETS

THE PERIPHERAL NERVOUS SYSTEM

Nerves: are made up of tiny _____ called _____ that transfer information using _____ and _____ signals.
Different neurons do differents tasks:

1-Sensory neurons collect information from our _____ organs (eyes, ears, nose, tongue, skin).

2-The _____ interprets the information and sends signals to the rest of the body.

3-Motor neurons send messages from the _____ to our _____ system.
