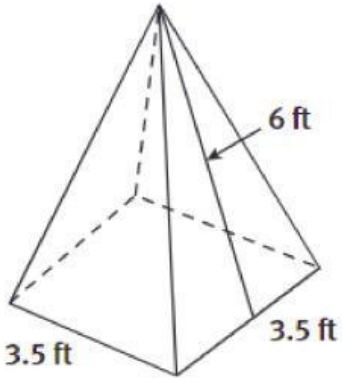
LATERAL AND TOTAL SURFACE AREAS OF PYRAMIDS

1)Find the surface area of the pyramid.

2)Use a net to find the lateral area of the pyramid.



3)Use the following information for Items 3 and 4.
A regular triangular pyramid has a base length of 4.6 centimetres and a slant height of 4 centimetres.
Use a net to find the lateral area of the pyramid.

4)If the height of the triangular base is approximately 4 cm, what is the surface area of the pyramid?
