PART III: Copy paragraphs in the correct order to make a well-organized ARTICLE.

I

Laptops were attractive, but they were still expensive. Laptops became more popular in the 1990s, when Microsoft launched Windows 95. The price of laptops went down and more people could buy them. Eventually, with the creation of the Internet, laptops became very popular for everyone.

II

We can finally say that laptops changed our lives drastically. People use laptops in many different places and for many different tasks: for entertainment, for work, for school and also at home. As technology continues to advance, who knows how long we will use the laptop?

III

Thirty years ago, almost nobody had a laptop. Today, laptops are a basic household device. Actually, I am using mine to write this article right now and I am almost sure you are using yours to read it. Will they still be here in 10 years? By knowing how laptops appeared and how they became more popular we will understand the evolution of the laptop.

IV

The first laptops had word processing and spreadsheet applications. Originally all information had to be saved to a disk, but later laptops could store information in the device's memory.

TYPE HERE THE CORRECT ORDER of the PARAGRAPHS. For example: I, II, III, IV
