

- 1) The two parallelograms above are similar. What is the length in inches of line segment PQ?

- 2) The two triangular prisms shown above are similar. What is the value of x , the height of the larger prism?

- 3) Triangle ABC is similar to triangle XYZ. What is the length of line segment BC?

4) Find the value of x .

5) Work out the missing angles

i =
j =

$$\begin{aligned} w &= \\ x &= \\ y &= \end{aligned}$$

$$\begin{aligned}x &= \\y &= \end{aligned}$$

$$\begin{aligned} a &= \\ b &= \\ c &= \end{aligned}$$
