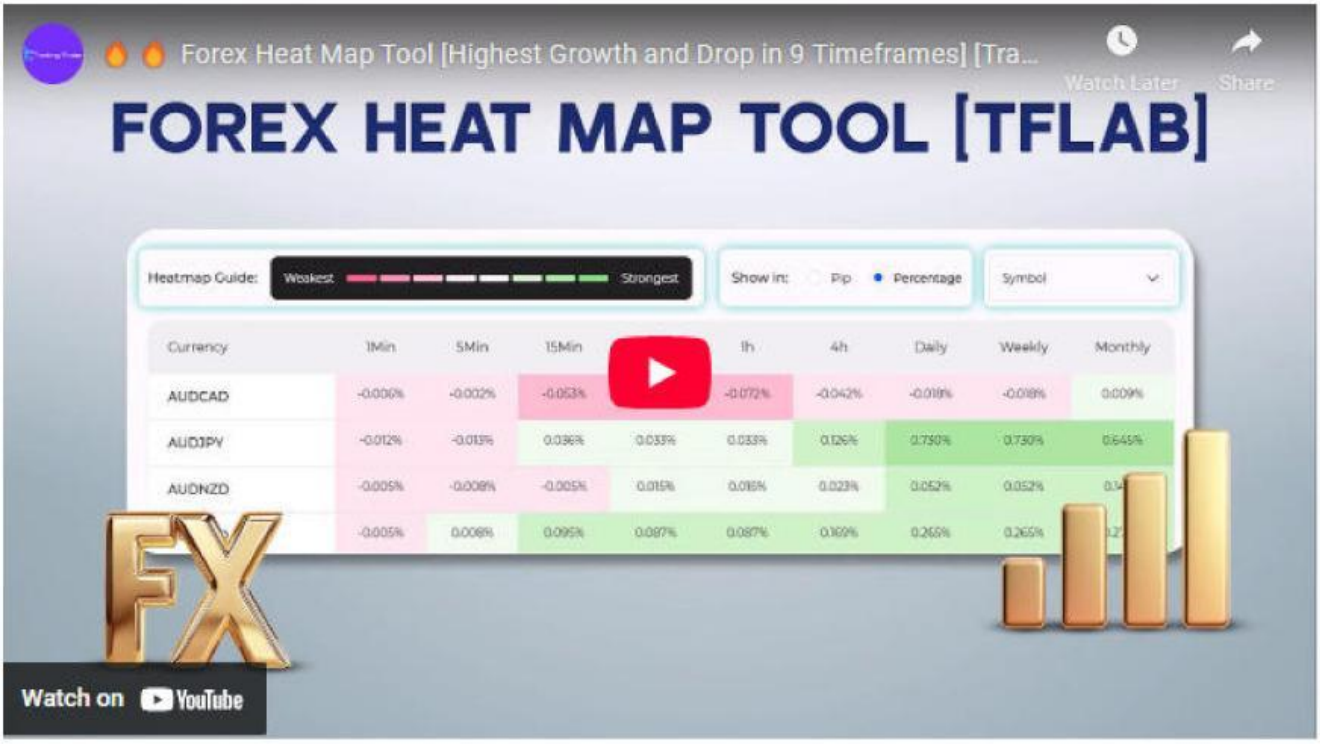
TradingFinder's Live Heat Map Tool

LIVEWORKSHEETS

The TradingFinder's market heat map tool provides access to price changes for **major forex currency pairs**, **gold**, and **silver**; the fluctuations are presented in both **pip** and **percentage** formats.

What is a Forex Heat Map?

A heat map is a live visual tool that shows the performance of tradable assets in the forex market using **two** colors: **green** and **red**. TradingFinder's heat map is useful for **identifying overall currency pair trends**, **recognizing asset correlations**, and **risk management**.

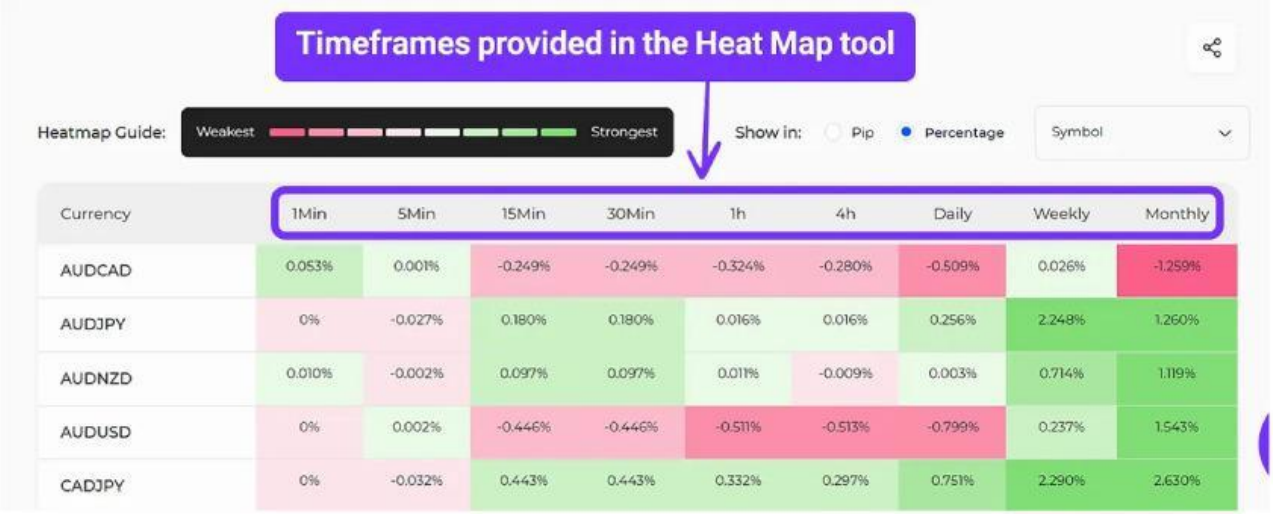


Features of TradingFinder's Heat Map Tool

This tool provides all necessary information about asset price changes. **Features of TradingFinder's heat map tool:**

- Support for **major**, **minor currency pairs**, and **precious metals**
- Information provided across **1-minute, 5-minute, 15-minute, 30-minute, 1-hour, 4-hour, daily, weekly**, and **monthly** timeframes

LIVEWORKSHEETS

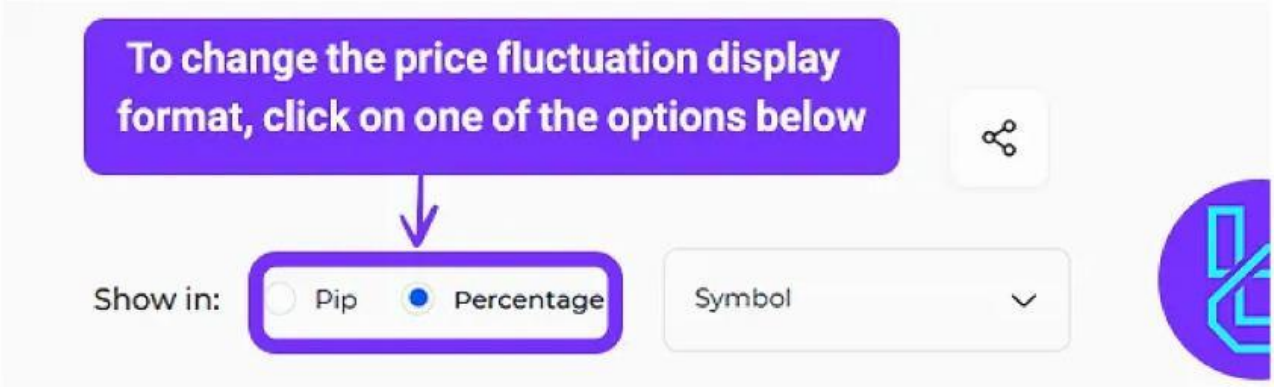


Display of price changes across 9 short-term and long-term timeframes

- Display of **highest price increases** in **green** and **largest price decreases** in **red**

Display of highest price increases and decreases using green and red colors

How to change price fluctuation display format?

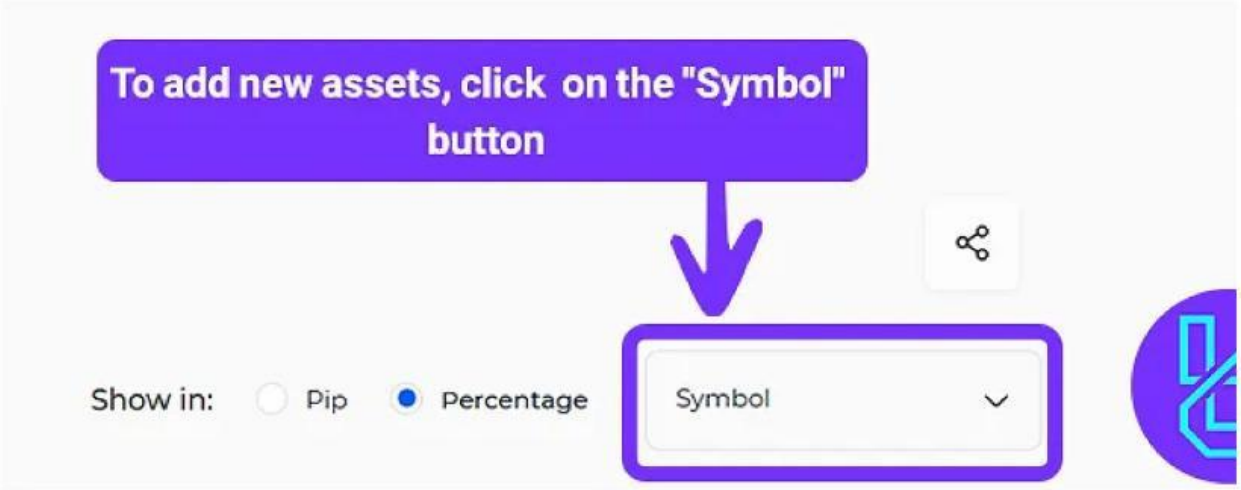


LIVEWORKSHEETS

To change the display format, simply click on your preferred option; the new format will be applied **automatically**.

How to Add a Symbol to the Heat Map Tool?

To add a new asset, click on the "**Symbol**" button; then type the desired symbol name and select it.



Click the "Symbol" button to add a new asset to TradingFinder's heat map

The selected symbol will be **automatically** added to the heat map and displayed at the end of the list.
