1 Read and tick the life process for each photo.

NUTRITION
We get energy and raw materials for our body to function.

SENSITIVITY
We sense what happens around us and respond to it.

REPRODUCTION
We have offspring similar to ourselves.

LIVEWORKSHEETS

2 Different organs in the body carry out the life processes.

ORGANS INVOLVED IN NUTRITION

The mouth is in the head. The heart, lungs, stomach and intestines are in the trunk.

ORGANS INVOLVED IN SENSITIVITY

The brain, eyes, ears, nose and tongue are in the head. The skin, nerves, bones and muscles are all over our body.

ORGANS INVOLVED IN REPRODUCTION

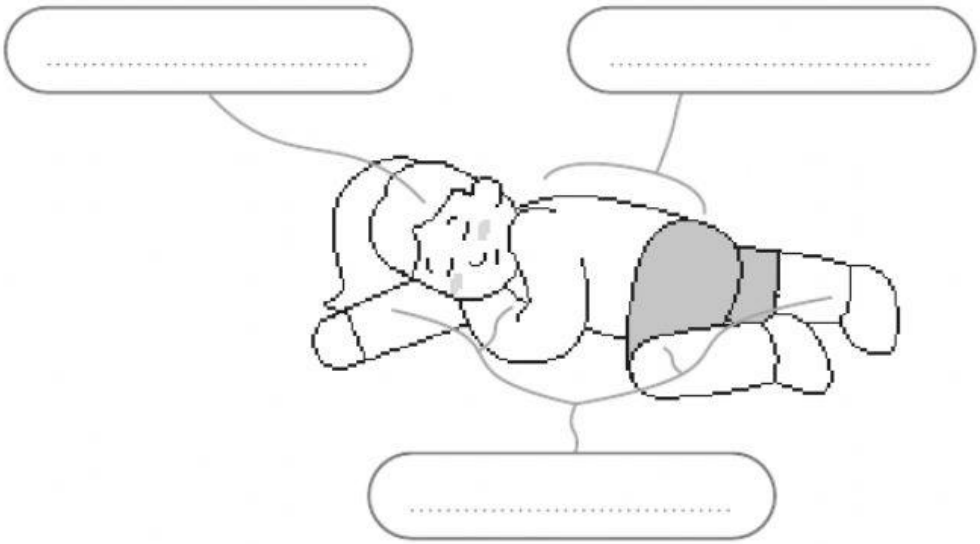
The testicles and the penis are in the male body. The ovaries and vagina are in the female body. These organs are in the trunk.

Match the life processes to the organs.

Nutrition	Ovaries	Head
	Heart	
	Skin	
	Bones	
	Vagina	
	Lungs	
	Penis	
Sensitivity	Brain	Trunk
	Ears	
	Intestines	
	Nerves	
	Muscles	
	Mouth	
Reproduction	Testicles	All over the body
	Stomach	

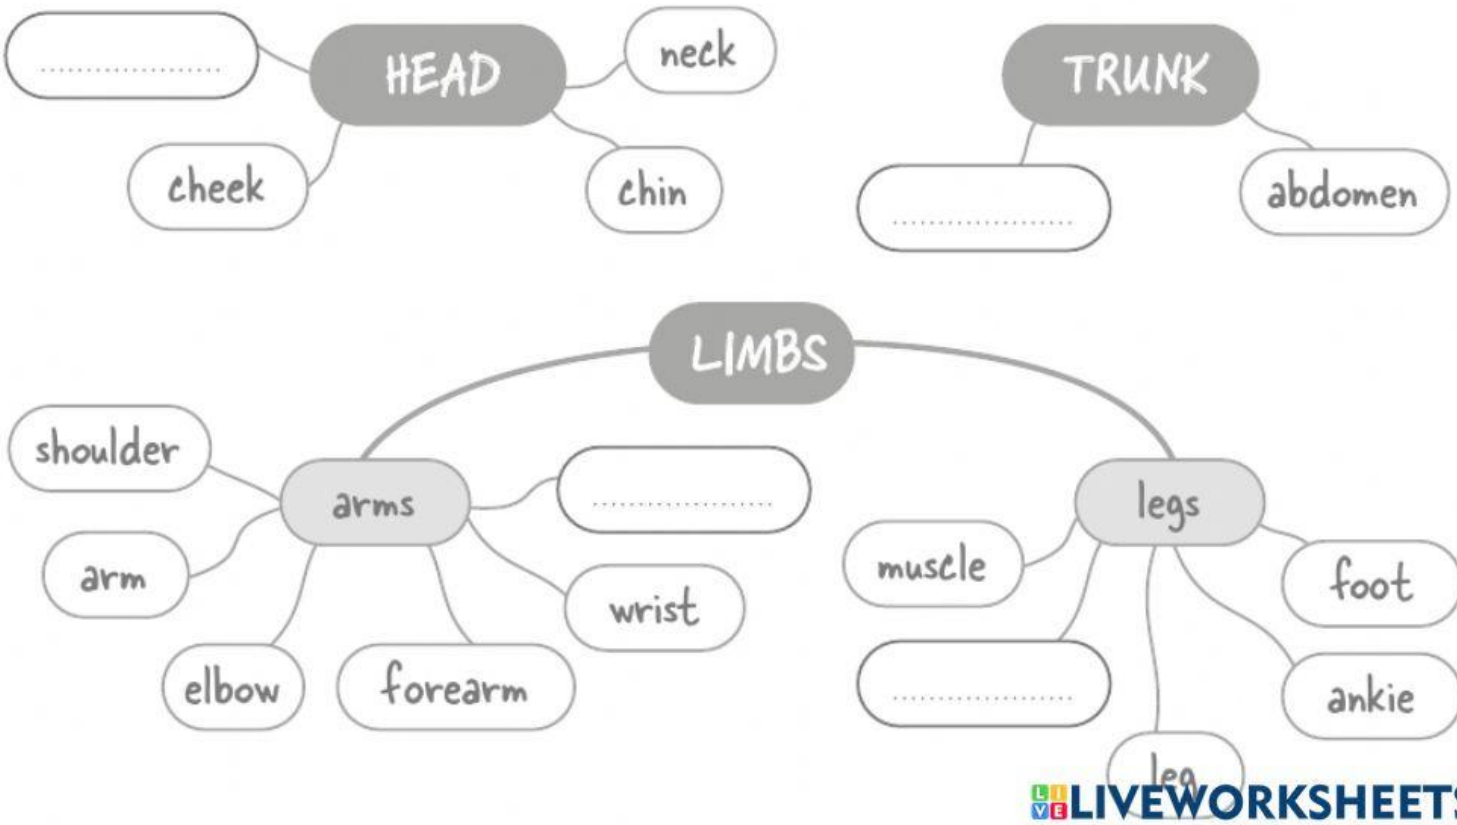
LIVEWORKSHEETS

1 Our body has three main parts: the head, the trunk and the limbs. Label the picture.



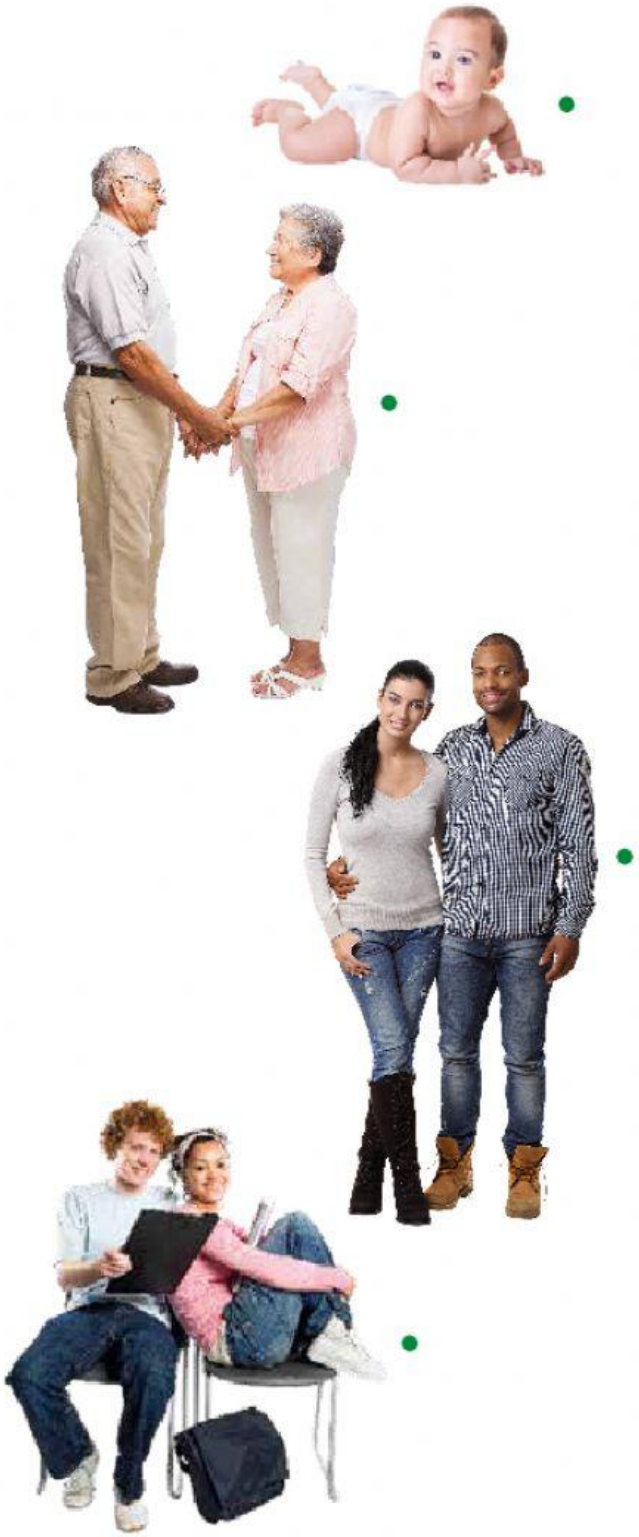
2 Complete the concept map with the parts of the body.

hand - forehead - thorax - knee



LIVEWORKSHEETS

3 Our body changes as we grow. Look and match the photos to the stages of life.



ADULTHOOD

Adults stop growing. Their body is fully developed.

CHILDHOOD

Babies grow very fast during childhood.

ADOLESCENCE

Boys and girls develop in different ways.

OLD AGE

Elderly people begin to lose strength and their muscles are weaker.

4 Copy and complete in your notebook.

Some parts of the head are: the chin, ... the ..... and the ..... .

The trunk has two parts, the ..... and the .....

We have four limbs. The upper limbs are the ..... and the lower limbs are the ..... .
