AI - L1 - What is AI

Let's answer - How is AI different from humans?

1:00

Name: Class:

1- Learns by looking at lots of data and patterns	Human
2- Can learn on their own and ask questions to understand better.	
3- Can do some tasks very fast, like sorting pictures or solving math problems.	
4- Maybe slower at some tasks but can understand meaning and context better.	
5- Cannot make decision on its own without rules or data.	
6- Does not have feelings or emotions, so it is bad at tasks that require showing empathy.	AI
7- Have feelings and emotions that affect how they think and act.	
8- Learn in many ways: by reading, listening, watching, and talking to others.	
9- Needs to be trained by humans to work well.	
10- Can make choices based on experience, feelings and values.
