Task 5: Read the passage and decide whether the statements are TRUE or FALSE. Con đọc đoạn văn và viết đáp án True (T) hoặc False (F) nhé

A house is a building that is made for people to live in. It is not a place that can be easily packed up and carried away like a tent or moved like a caravan. If people live in the same house for more than a short stay, then they call it their "home".

Houses have many different shapes and sizes. They may be as small as just one room, or they may have hundreds of rooms. They also come in many different shapes and may have just one level or several different levels. A big building with lots of levels and apartments is called "a block of flats" or an apartment block.

Houses have a roof to keep off the rain and sun, and walls to keep out the wind and cold. They have window openings to let in light, and a floor. Houses of different countries look different to each other, because of different materials and styles.

1. A house is not easily to be packed up and carried away like a tent. _____
2. If people live in the same house for a short stay, they call it their "home". _____
3. Small houses and big houses have the same number of rooms. _____
4. A block of flats is a big building with lots of levels and apartments. _____
5. Both houses and apartment blocks may have different levels. _____
6. Houses have a roof to keep off the rain, sun, wind, and cold. _____
