4 Read the text. Answer the questions. (5 points)

In Malawi, Africa, there are people who want to hunt animals like elephants and rhinos. Now, people who work in Malawi's national parks are using drones to protect the animals. At night, the drones fly over the places where the animals live. When the drone pilots see people who shouldn't be there, they turn on the drone's lights to scare them. The drones can travel farther and faster than people in cars, so it's easy to protect a bigger area of the park.

1. Where are they using the drones? _____
2. What animals are they protecting? _____
3. When do they use the drones? _____
4. What do they do when they see people in the parks?

   _____

5. Why is it better to use drones than people to protect the animals?
