Read the text and answer the questions. Circle the correct answer.

Protecting the Environment

Our planet is home to many animals and plants. Some animals are in danger because people cut trees and throw litter in forests and rivers. We should protect wildlife and keep nature clean. In summer, it is very hot, and animals need water to survive. In winter, it can be cold and rainy. If we care for nature, we help animals live safely in their habitats.

1. Animals are in danger because people:
A. plant trees
B. cut trees
