Name: **Class:**

UNIT 8:NEW WAYS TO LEARN

In the past, students mainly learned by listening to teachers and reading textbooks. However, modern technology has completely changed the way students study today. Thanks to the Internet, learning is no longer limited to the classroom.Students can now join online courses, watch educational videos, and even attend virtual classes from home.

One popular method is blended learning. This approach combines traditional face-to-face lessons with online activities. For example, students may study new vocabulary through interactive apps before discussing it in class. This helps them become more independent and responsible for their own progress.

Another new trend is gamification. Teachers use games, quizzes, and reward systems to make lessons more engaging. When students feel excited, they are more motivated to participate actively. In addition, artificial intelligence (AI) tools can provide personalized feedback. These systems analyze students' performance and suggest suitable exercises to improve weak areas.

Although technology offers many advantages, students must learn to manage their time effectively. Without good discipline, online learning can become distracting. Therefore, schools should guide students on how to use technology wisely.

In conclusion, new ways of learning are making education more flexible, interactive, and personalized. If used properly, they can greatly improve students' learning experiences.

LIVEWORKSHEETS

PART A:Match the words with their definitions

1.Blended learning	A. Designed to meet the needs of a particular person
2.Gamification	B. The ability to control yourself and work responsibly
3.Personalized	C. A method that mixes online learning with classroom teaching
4.Interactive	D. Involving communication between people or things
5.Discipline	E. Using game elements in non-game activities

PART B:Decide if the statement is True or False

1.In the past, students only learned through online courses.	T	F
2.Blended learning combines traditional and online learning.	T	F

LIVEWORKSHEETS

3.Gamification makes lessons more boring.

T F

4.AI tools can give feedback to students.

T F

5.Time management is important in online learning.

T F

PART C:Choose the best answer for each question

1.What has changed the way students learn today?

A. Newspapers
B. Modern technology
C. Libraries
D. Sports

2.What does blended learning include?

A. Only online classes
B. Only classroom lessons
C. Both online and face-to-face learning
D. Watching TV

LIVEWORKSHEETS

3.Why do teachers use gamification?

A. To reduce homework
B. To make lessons more engaging
C. To cancel exams
D. To replace teachers

4.What can AI tools do?

A. Replace students
B. Analyze performance and give feedback
C. Close schools
D. Print textbooks

5.What is necessary for successful online learning?

A. Expensive computers
B. Traveling abroad
C. Good discipline
D. Fewer teachers
