Some 6) _____BRITAIN people find it upsetting when they are teased about their hair.

Read the text and for each task 1-7 choose the correct answer 1, 2, 3 or 4.

The Truth about Lying

It's easy to know when someone is lying, right? 1) _____you have to do is look at a person's body language; when a person is lying, he becomes nervous and fidgety, touches his nose and bites his nails. This is what people commonly believe, 2)_____. However, Dr

Samantha Mann of Portsmouth University, England, has 3)_____to an entirely different conclusion. Researching the behaviour of suspects who had given incorrect statements in police interviews, Mann discovered that liars actually stay quite still. This is because they know that people are looking for body language that could suggest they are lying.

Therefore, liars 4)_____ fact touch their noses 20% less than truthful people. The same 5)_____ for eye contact. You may think that people avoid eye contact and blink rapidly when they are 6)_____lies. In reality, it seems, liars make sure they 7) _____eye contact with the interviewer and control their blinking.
