📖 1. READING: A Job Interview at a Hospital

Instructions: Read the text carefully and complete the activities.

Emily Carter is a young doctor. She finished her medical studies recently and applied for a job in the emergency department of a private hospital.

Before the interview, Emily prepared carefully. She read information about the hospital and reviewed common emergency cases. She wanted to show that she was responsible and ready to work in a team.

During the interview, the doctors asked her questions about her experience. Emily talked about a patient who had chest pain and difficulty breathing. She explained how she checked the patient, monitored basic vital signs, and quickly informed the senior doctor. She said it is important to stay calm and act fast in emergency situations.

The interviewers also asked about communication. Emily said that doctors must speak clearly and be kind to patients. She explained that many patients feel nervous, so doctors should listen carefully and explain treatments in simple words.

At the end of the interview, Emily asked questions about the job and working hours. A few days later, she received an email. The hospital offered her the job because they liked her attitude and communication skills.

LIVEWORKSHEETS
