8. This is the house (which / who) my parents built.

D. Reading Comprehension (1 text + 3 tasks = 12 pts)

Read the text and answer the questions.

The Plastic Problem

Every year, people produce over 300 million tonnes of plastic. Much of it ends up in the oceans, where it causes serious harm to marine life. Sea turtles, whales and seabirds often mistake plastic for food and die after eating it. Scientists are working on ways to reduce plastic pollution. Some countries have banned single-use plastic bags and bottles, while others are developing biodegradable materials. However, experts say that the most effective solution is to change our habits — use less plastic and recycle more.

LIVEWORKSHEETS

1. Multiple choice (4 pts)

1. Where does a lot of plastic end up?
   a) in the forests b) in the oceans c) in the air

2. What happens to animals that eat plastic?
