III. Read the passage and decide whether the following statements are True or False.

These are three main types of pollution: air pollution, water pollution and noise pollution. Smoke in the air from factories contains carbon monoxide, carbon dioxide, and methane, which are all poisonous gases. This leads to health problems like asthma and lung diseases. China, the USA, Russia, India, Mexico and Japan are the world leaders in air pollution emissions. Water is also polluted by the discharge of commercial and industrial waste is into surface water. Sewage in

drinking water is another cause of water pollution as it contains germs and viruses. The noise of vehicles and factories can be really unbearable. This kind of constant sound also causes headaches, tension, mental stress and migraines. People living next to a building site where there is too much noise can become sick, as they cannot sleep or relax. This is called noise pollution.

Write T or F.

10. Air pollution, water pollution and soil pollution are main kinds of pollution. _____
