TEMPORALS-Orit's set

FUTURE TEMPORALS

The **time clauses** in the English language are introduced by Temporals

such as *after, as soon as, before, till, until, when, whenever, while*

or time expressions such as *the minute, the moment* etc.

We do not use the <u>future tense</u> (will) in a time clause to describe

future activities. (in this respect, it is similar to <u>if clauses</u>).

<u>As soon as</u> you push this button the door will open.

Don't stand up <u>till (until)</u> I tell you.
