I. Put the verbs in the correct form.

1. I'm going to have Michael _____ (look) into my laptop to see what is wrong.
2. Her father will not let her _____ (marry) that poor guy.
3. I made my cousin _____ (call) her and apologize.
4. I really must get a plumber _____ (fix) the central heating.
5. He may have the car _____.(sell)
6. I had already got my hair _____. (cut)
7. I'll get Tim _____ (do) it when he comes home.
8. The students were made _____ (come) earlier.

II. Read the passage and choose the best answer.

Endangered species are plant and animal species which are in danger of extinction. Over 8,300 plant species and 7,200 animal species around the globe are threatened with extinction, and many thousands more become extinct each year before biologists can identify them.

The primary causes of species extinction are habitat destruction, commercial exploitation and pollution. The drainage of wetlands, cutting of forests, urbanization and road and dam construction have destroyed or seriously damaged natural habitats. Since the 1600s, worldwide commercial exploitation of animals for food and other products has seriously reduced the number of rare species. Toxic chemicals in the air and land, contaminated water and increased water temperatures have also driven many species to the verge of extinction.

Plant and animal extinction leads to a loss of biodiversity. Maintaining biodiversity is important for us in many ways. For example, humans depend on species diversity to have food, clean air and water, and fertile soil for agriculture. In addition, we benefit greatly from the many medicines and other products that biodiversity provides.

Different conservation efforts have been made in order to save endangered species. The Red List – a global list of endangered and vulnerable animal species – has been introduced to raise people's awareness of conservation needs. Governments have enacted laws to protect wildlife from commercial trade and overhunting. A number of wildlife habitat reserves have been established so that a wide range of endangered species can have a chance to survive and develop.

9. The number of species around the globe threatened with extinction is over _____.

A. 7,200 **B.** 8,300 **C.** 1,600 **D.** 15,000

10. Which of the following is NOT mentioned as a primary cause of species extinction?

A. pollution **C.** habitat destruction

B. natural selection **D.** overexploitation

11. The Red List is a special book that provides names of _____ animals.

A. vulnerable and endangered **C.** endangered

B. hunted **D.** extinct

12. The development of wildlife habitat reserves helps_____.

A. save a large number of endangered species

B. make a list of endangered species

C. enact laws to protect wildlife

D. develop commercial trade and overhunting

13. The best title for the passage is_____.

A. Endangered Species and Conservation Measures

B. Endangered Species and their Benefits

C. The Global Extinction Crisis

D. Endangered Species Extinction: Causes and Conservation Measures
