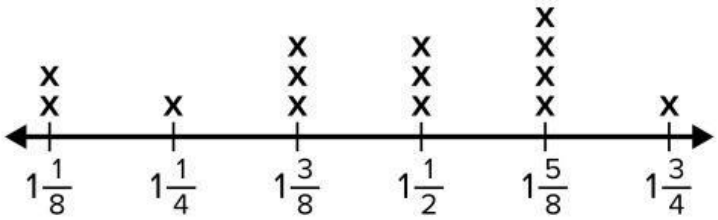
**1.** Cassie measures the lengths of some beetles for a project.

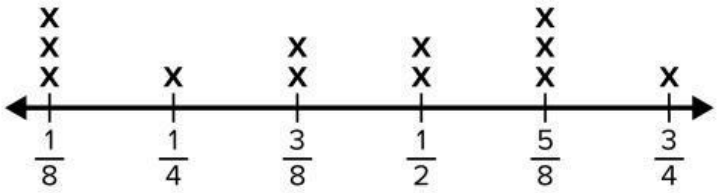


**Lengths of Beetles (inches)**

**a.** What is the difference in length between the longest and shortest beetles?

**b.** What is the total length of the beetles that are $1\frac{3}{8}$ inches long?

**2.** The line plot shows the amounts of blueberries that 12 friends picked.



**Amounts of Blueberries (gallons)**

The friends decide to divide the blueberries so each friend has the same amount of blueberries. How many gallons of blueberries does each friend get?
