Chapter 5 – Lesson 2

Elements

Compare between metals, nonmetals and metalloids using the following keywords:

(Luster – Dull – Usually have luster - Good conductor– Semiconductor – Poor conductor – Malleable and Ductile – Soft and Brittle – Can be hard or soft – All solid except Mercury – Most of them are gases – All of them are solid)

	Metals	Metalloids	Non-Metals
Luster / Dull	1.....	1.....	1.....
Malleable/Ductile Soft/ Brittle	2.....	2.....	2.....
Conductivity	3.....	3.....	3.....
State of elements	4.....	4.....	4.....
