Part IV. Read the passage carefully and answer the questions

Albert Einstein was born on 14th March 1879 in Germany. Around 1886, he began his school in Munich. As well as his violin lessons, which he had from age six to thirteen, he also had religious education at home where he was taught Judaism. Two years later he entered the Luitpold *Gymnasium* and after this his religious education was given at school. He began to study mathematics, in particular the calculus, in 1891. In 1894 his family moved to Milan but he remained in Munich. In 1895 Einstein failed an examination that would have allowed him to study for a diploma as an electrical engineer at the Eidgenussische Technische Hochschule (ETH) in Zurich. Indeed, he succeeded with his plan graduating in 1900 as a teacher of mathematics and physics. In 1905 he proposed the special theory of Relativity. Einstein received the Nobel Prize in 1921. He died on 18th April 1955 in Princeton, New Jersey, USA. He was cremated at Trenton, New Jersey at 4 p.m. on 18th April 1955 (the day of his death). His ashes were scattered at an undisclosed place.
