I know this is a hot take but the "let them theory" as Mel Robbins' describes it, is very black and white. Like most over simplistic self help books, it takes something with a k[redacted] of truth (stop fighting with reality) and acts as though it's a magical solution to all your problems. Перекласти 1/2

People are f[redacted] and fake as fuck. I get it. Their perceptions are so easily swayed as its filtered through whatever lens they experience life within. It doesn't have anything to do with me but that's exactly it. I don't want people who are inconsistent in how they choose to operate with me to have anything to do with me. Перекласти

I'm kind of learning Korean for fun & something to s[redacted]d boredom. It's not serious but it's fulfilling. Really enjoying learning Hangul because using a different lettering system is like solving a puzzle with every word but I've just reached the point where I'm learning that the character that makes a D sound, also make a T sound but the S character also makes a T sound and that's after getting over the R character also making L sound and the G character making a K sound and now I'm like 😵 Перекласти
