Worksheet: Specialized Animal Cells and Their Functions

Task 1: Basic Level (Matching)

Instructions: Match the type of cell in Column (A) with its correct description or function in Column (B).

Cell Type	Description or Function
1. Red blood cells	A. They carry electrical signals between different parts of the body.
2. Neurones (Nerve cells)	B. They have tiny hairs called "cilia" to sweep mucus.
3. Ciliated cells	C. Small cells with no nucleus used to transport oxygen.
