ACTIVITY 1: THE CASE FILES

Listen to the audio by clicking on the speaker button and fill in the blank with the correct words.

Alya: Have you noticed how 1) _____ we have become on digital technology lately?

Raka: Absolutely. Almost every school activity now relies on the internet, from submitting assignments to joining 2) _____ discussions.

Alya: That's true. But despite its advantages, digital technology also creates some serious issues.

Raka: For example, connectivity problems. When the internet is unstable, students can easily miss important information.

Alya: Not only that. Some students also struggle to manage their time because digital devices can be very distracting.

Raka: I agree. Social media, online games, and endless notifications often 3) _____ students' concentration.

Alya: Another issue is digital inequality. Not all students have access to reliable devices or a strong internet connection.

Raka: That can lead to unfair learning 4) _____. Students with better access tend to perform better.

Alya: Exactly. So, what do you think schools should do to solve these problems?

Raka: I think schools should provide better infrastructure, teach digital literacy, and guide students to use technology responsibly.

Alya: That sounds 5) _____. Digital technology is useful, but we need to use it wisely.

Raka: Right. Technology should support education, not become a burden.
