Fill in the blanks with words from the list below:

(invested, outside, indoors, access, at, these, attract, most, on, abroad)

Brain drain is the migration of skilled human resources for trade, education, etc. Trained health professionals are needed in every part of the world. However, better standards of living and quality of life, higher salaries, ... to advanced technology and more stable political conditions in the developed countries ..... talent from less developed areas. The majority of migration is from developing to developed countries. This is of growing concern worldwide because of its impact ..... the health systems in developing countries. These countries have ..... in the education and training of young health professionals. This translates into a loss of considerable resources when..... people migrate. The intellectuals of any country are some of the most expensive resources because of their training in terms of material cost and time, and ..... importantly, because of lost opportunity.

In 2000 almost 175 million people, or 2.9% of the world's population, were living ..... their country of birth for more than a year. Of these, about 65 million were economically active. This form of migration has in the past involved many health professionals: nurses and physicians have sought employment ..... for many reasons including high unemployment in their home country.
