.....

6 the vegetables in your dinner / grow / in the garden ? (past)

.....

3 * Rewrite the text using the past, present and future passive. Use *by* if necessary.**

They don't broadcast music in the normal way at silent discos. So how do people hear the music? Everyone wears wireless headphones. These detect a signal and people hear the music.

People used the term 'silent disco' for the first time in 2005 at Glastonbury Festival in England. They wore headphones then to avoid breaking local noise restrictions. *The Oxford Dictionary Online* officially recognized the term in 2011.

In the future, they will adapt silent discos to other forms of entertainment. We are going to see more and more silent events, such as silent theatre and silent opera.
