Help the Earth - Recycle!

Recycling is using something you don't need any more to make something new. This helps the Earth because we don't make so much rubbish.

We can't recycle everything, but we can recycle metal, paper, glass and plastic. For example, we can recycle empty metal cans of soft drinks, boxes and glass bottles. We can use old plastic bottles to make new bottles and also shoes and clothes.

Everyone can recycle: just put metal, paper, glass and plastic in the recycling bins, not in the rubbish. So, next time you clean your room, think: What can I recycle?

VALUE Help protect the environment.

Exercise 2: True or False

Mark with an ✓ if the following sentences are true or false.

	T	F
a. recycling is making new things from old things		
b. Recycling makes rubbish.		
c. We can recycle everything.
