Internet Safety

The internet can be a wonderful tool for you. It can be helpful to do your homework, find practical information, communicate with friends and family, and play educational games. On the other hand, the internet can also cause some serious probelms for you. For example, bullies, called cyberbullies, can use the internet to be mean to other people. The worst of all is an online predator. This is someone who tries to to become your friend with a false name. They might ask you to meet them, but you should never talk to or meet someone your family doesn't know. It could be very dangerous!
You need to be smart when you use the internet. Always talk to your parents and teachers about any dangers you see.
