Oblicz:

$6 \cdot \frac{3}{4} = \frac{\square \cdot \square}{\square} = \frac{\square}{\square} = \square\frac{\square}{\square}$

$\frac{1}{2} \cdot 3 = \frac{\square \cdot \square}{\square} = \frac{\square}{\square} = \square\frac{\square}{\square}$

$\frac{7}{10} \cdot 10 = \frac{\square \cdot \square}{\square} = \frac{\square}{\square} = \square$

$9 \cdot \frac{2}{3} = \frac{\square \cdot \square}{\square} = \frac{\square}{\square} = \square$

$\frac{2}{5} \cdot 5 = \frac{\square \cdot \square}{\square} = \frac{\square}{\square} = \square$

$14 \cdot 2\frac{3}{10} = \frac{\square \cdot \square}{\square} = \frac{\square}{\square} = \square\frac{\square}{\square}$

$15 \cdot 1\frac{9}{20} = \frac{\square \cdot \square}{\square} = \frac{\square}{\square} = \square\frac{\square}{\square}$

$8 \cdot 1\frac{5}{6} = \frac{\square \cdot \square}{\square} = \frac{\square}{\square} = \square\frac{\square}{\square}$

$6 \cdot 2\frac{2}{3} = \frac{\square \cdot \square}{\square} = \frac{\square}{\square} = \square$

$9 \cdot 3\frac{5}{9} = \frac{\square \cdot \boxed{32}}{\square} = \frac{\square}{\square} = \square$
