2 In your notebook, make 3 sentences using the vocabulary in the chart.

We can	hit hurt cut break	our	heads arms hands fingers legs faces stomachs backs	if	we run too fast in the school hall.
					we don't use the necessary protection.
					we don't follow our teacher's suggestions.
					we don't pay attention when we walk.
					we jump on the school stairs.
					we don't look in front of us.
					we push our classmates in a game.

3 Read the next interview with Ms. Román.

Man: Hello, everybody! Welcome to our 'Safe Schools' programme. Today we're here with Ms Román, a Physical Education teacher who works at Puerto de Buenaventura School in Cali. How are you today, Ms Román?

Ms Román: Hello. I'm fine, thank you. I'm very happy to be here

Man: Tell us, Ms Román, what are the typical accidents students have in your school?

Ms Román: Well ... students usually have simple accidents because they don't pay attention or don't follow the rules when they play sports. For example, one of the most common accidents I have in my classes is when students hurt themselves, especially their elbows and their knees.

Man: Why does this happen?

Ms Román: They hurt themselves because they run too fast and they don't look in front of them. Sometimes also because students push other students by accident.
Man: Aha! Any other accidents?
Ms Román: Well ... there's another common accident. Students hit their heads or legs on the chairs or the tables in the classrooms, and also the chairs in the playground. Again, this usually happens because students don't pay attention when they walk or run.
Man: OK. Well, dear listeners, this is another story from a Colombian school. We'll be back later with another interview. Ms Román, thank you very much for your time.
Ms Román: Thank you. And remember, it's very easy to prevent accidents at school. Pay attention!

3 Write in your notebook (T true or F false)

	T	F
1. Ms Román is a Mathematics teacher.	☐	☑
2. Students usually have accidents because they don't pay attention.	☐	☐
3. Students often cut their fingers.	☐	☐
4. Sometimes a student can push another student by accident.	☐	☐
5. The stairs and the hallways are typical places where accidents happen.	☐	☐
6. For Ms Román, attention is the best way to prevent accidents at schools.	☐	☐
