BK4U5 E-Money 課文聽力 (22*5 分) Class / No / Name:_____

When the next customer was ready to pay for her fruit tea, she **takes** / **took** out her smartphone and **held** / **hold** it in front of a small machine on the counter. The machine **scan** / **scanned** her phone and made a beeping sound. The **paying** / **payment** went smoothly, and it took only seconds to **complete** / **completed** the process.

Among the many **benefits** / **benefit** of making payments with our phones, the **mager** / **major** one is convenience. Wallets are usually big and **heavier** / **heavy**. Going out without them can **safe** / **save** us a lot of trouble. Besides, **using** / **use** e money means we don't need to worry if we **had** / **have** enough cash with us. For example, if we **forgot** / **forget** to bring our wallet to a restaurant, we wouldn't be **embarrassing** / **embarrassed** about having to borrow money from others. Also, if we **ran** / **run** out of money, it wouldn't be **necessary** / **necessarily** for us to find an ATM. The only challenge is to remember not to spend more than we can **afford** / **affordable**!

However, it is **secure** / **security** that we really need to be aware of when we use e-money. If our phones were **stole** / **stolen** by thieves, they could **secretly** / **secret** use our identities and make us **pays** / **pay** for things we didn't buy! Nevertheless, as **long** / **lone** as we are careful, this shouldn't be too much of a **risk** / **lisk**.
