PARTS OF AN ORAL PRESENTATION

1

Good morning classmates! Today we are going to talk about the main problems that students at UTN identify as important in the campus. 2

We asked the questionnaire to 20 participants and here are the results. Question 1 asked students how they considered the cafeteria service at the university. 70% of the students responded that it was inadequate. Question 2 asked the students how they would improve the cafeteria and they stated that they would change the menu. 3

4 Overall, this graph shows that the main problems that students identify at the university are the cafeteria, the bus stops outside the university and the lack of air conditioning in some classrooms.

Any questions from the audience? 5

Thank you for your attention. 6

Write the number that represents the example next to the name of the part of the oral presentation.
