NAME:

CLASS : 4

DATE :

Match the following sources of energy to the correct description.

Source of energy	Description
Sun	Produces kinetic energy that move windmill blades
Wind	Formed from the decay of plants and animals that died thousands of years ago
Battery	Exists in different shapes and sizes to supply electrical energy
Fossil fuel	Main source of light for life on Earth
Water	Produced from nuclear materials to generate electrical energy
Food	Has potential energy that is used to generate electrical energy
Wave	Organic matters from plants and animals that release energy when burned
Nuclear	Gives energy to humans and animals and stored in the form of chemical energy
Biomass	Contains kinetic energy which can generate electrical energy
