Sorting activity questions

Look at the Bohr Models on the periodic table to answer the following questions

1. Periods go in (***rows, columns***) across the periodic table from left to _____.
2. The ***number*** of valence electrons in the elements in a period increase from _____ to _____.
3. The elements in a period have the same number of _____ levels in their models.
4. There are _____ periods on ***this*** periodic table.
5. Families go in (***columns, rows, diagonal***) on the periodic table
6. The elements in a family/group have the same number of _____ electrons.
7. The reason the elements in a family/group have similar properties is because they have the same number of _____ _____.
8. Periods on the periodic table correspond to _____ levels, families on the periodic table are grouped by _____ _____.
