The Bermuda Triangle is an area of the Atlantic Ocean. It is famous because many unlucky boats and planes have disappeared here. Why? It's a mystery. In the last 100 years, more than 50 boats and 20 planes have gone into the triangle and not returned. One of the most famous stories was in 1945. Five planes were flying through the triangle when they lost radio contact. Another plane went to rescue them, but this plane disappeared too. Nobody found the six planes and pilots. Why? Well the area has very bad weather and huge waves. It is possible that pilots and sailors made mistakes or that they met pirates. Not everybody believes that. Many people think that it is a dangerous place. And some think aliens attacked the boats and planes. What do you think?
