

# Q4 SCIENCE WORKSHEET 4

## Water Cycle

**Direction:** Label the processes of water cycle. Write **PRECIPITATION, EVAPORATION, COLLECTION, CONDENSATION** or **TRANSPERSION** in the box provided.

Identify which process is being described.

- \_\_\_\_\_ 5. It is the process where the plant roots absorb water and release the water in the form of water vapor through the leaves.
- \_\_\_\_\_ 6. It is the process by which the water vapor in the air changed into liquid water.
- \_\_\_\_\_ 7. The process by which the heat of the sun makes the water molecules move faster.
- \_\_\_\_\_ 8. The process by which the water is released from the clouds in the form of rain, freezing rain, snow or hail
- \_\_\_\_\_ 9. When it rains, water goes back to the bodies of water. Some water also goes to the soil. The water in the soil is absorbed by the plants. Once collected, it goes to the bodies of water and undergoes the process of evaporation.
10. Water vapor that comes out from the boiling kettle is an example of \_\_\_\_\_.
