Question 26: _____ Question 27: _____

Read the following passage and write the letter A, B, C or D on your answer sheet to indicate the correct answer to each of the questions from 28 to 32.

Reducing Plastic Waste – A Shared Responsibility

Plastic waste has become one of the most serious environmental problems in the world. Every year, millions of tons of plastic end up in the oceans, harming marine life and polluting ecosystems. Sea turtles often mistake plastic bags for jellyfish and swallow **them**, which can lead to death. Therefore, some actions must be taken to reduce plastic use.

Several countries have banned single-use plastic products such as straws, cups, and packaging. Others encourage people to bring their own containers, use cloth bags, and choose reusable water bottles. Supermarkets and restaurants are also joining the effort by offering greener options.

In schools, students are learning how plastic affects the environment. Many campaigns have been **launched** to raise people's awareness. For example, students are collecting plastic bottles for recycling or joining clean-up activities in their communities. These small actions can lead to big changes if more people take part in.

Although governments play an important part, individual efforts also matter. Choosing to carry a reusable bag or refusing a plastic straw may seem small, but together, these decisions can reduce plastic pollution. The fight against plastic waste requires cooperation between people, businesses and governments.

TIẾNG ANH THẦY TUẤN
