Read the following passage and mark the letter A, B, C or D on your answer sheet to indicate the correct answer to each of the following questions from 31 to 36.

ASIMO (Advanced Step in Innovative Mobility) is a humanoid robot created by Honda in 2000. It is currently displayed in the Miraikan museum in Tokyo, [1] Japan. ASIMO has the ability to **recognize** moving objects, postures, gestures, its surrounding environment, sounds, and faces, which enables it to interact with humans. The robot can detect the movements of multiple objects by using visual information captured by two [2] cameras "eyes" in its head and also determine distance and direction. This feature allows ASIMO to follow or face a person when **approached.** The robot interprets voice commands and human gestures, enabling it to recognize when a handshake is offered or when a person waves or points and then respond accordingly. [3] ASIMO's ability to distinguish between voices and other sounds allows it to identify its companions. ASIMO is able to respond to its name and [4] recognize sounds associated with a falling object or collision. This allows the robot to face a person when spoken to or look towards a sound. ASIMO responds to questions by nodding or providing a verbal answer in different languages and can recognize approximately [5] ten different faces and address them by name.

Question 31. What is the main idea of the passage?
A. The history of Honda company
B. The features and abilities of ASIMO robot
C. How robots help people at work
D. The development of artificial intelligence

Question 32. The word "**recognize**" in the passage is closest in meaning to:
A. Ignore B. Identify C. Forget D. Destroy

Question 33. The word "**approached**" in the passage is opposite in meaning to:
A. Moved away B. Walked toward C. Touched D. Recognized

Question 34. Which of the following is NOT true according to the passage?
A. ASIMO can recognize human voices and faces.
B. ASIMO can only answer questions in Japanese.
C. ASIMO can respond to human gestures.
D. ASIMO can detect movements of multiple objects.

Question 35. How does ASIMO detect the movement of objects?
A. By using a microphone B. By touching objects
C. By using two cameras in its head D. By hearing sounds

Question 36. What can ASIMO do when it hears a sound?
A. It can dance.
B. It can turn its head towars the sound
C. It can run away
D. It can switch off.

LIVEWORKSHEETS
