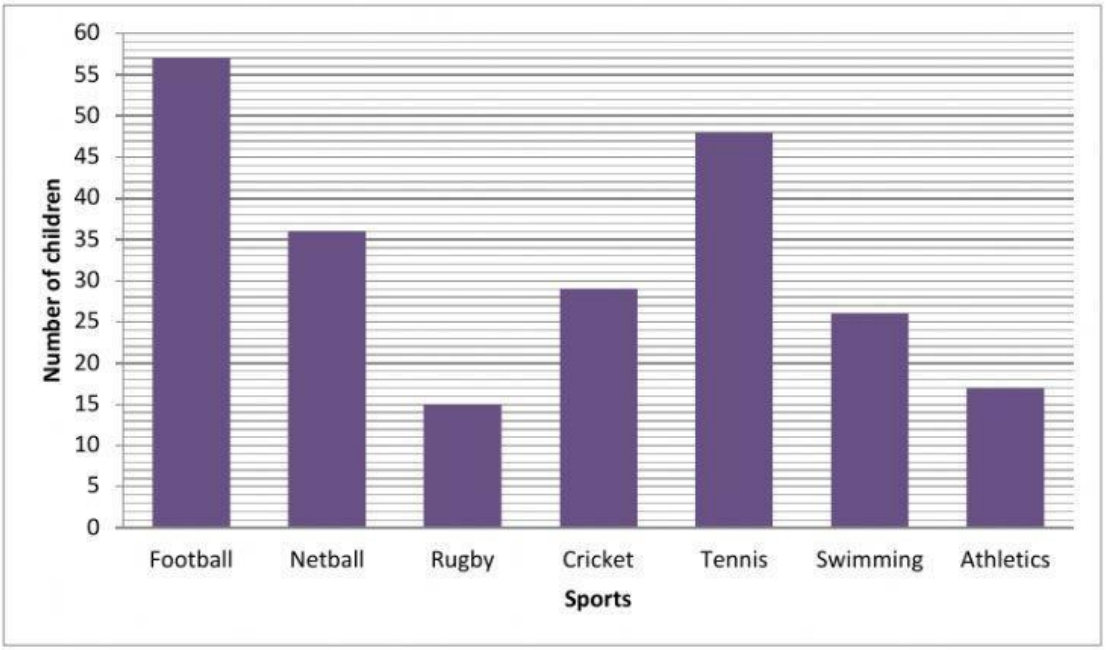
Name: _____ Mathematics Year 4 (Week 11)

Topic: Bar Graph

A graph to show which sport children voted as their favourite



1. 74 children like football and which other sport?

2. What is the difference between the total of children who prefer athletics and swimming and the number of children who prefer football?

3. What is the difference between the total of the two most popular sports and the total of the two least popular sports?

4. The least popular sport has 33 fewer votes than which sport?

Challenge

How many children like sports played without a ball?

What is the total number of children who voted?
