Directions: After reading the scenario below, answer the 3 questions that follow.

Tammy was curious about which area in her yard would have the most snow. So, she made some observations to find out. After a strong snowfall (NOT like yesterday) she noticed that more snow was in her backyard then was in her front yard or side yard. She inferred that her backyard was colder then her front yard.

1. What was her IV? (independent variable)

2. What was her DV? (dependent variable)

3. Make another inference from her observations.
