What ***..will...*** the world be like in fifty year's time? Will everything be different or just the same? Some people believe that we won't read books made of paper any more. They think all our books will be (1)..... computers.

To read, we will turn on the computers, (2).....will be small enough to carry in our pockets. To turn over to the next page, we have to speak (3)..... the computer. There won't be bookshops. We tell the computer the name of the book we want, and then it will copy the book (4).....us. After a few minutes, the book will be on our own computers.

I don't think I'll enjoy reading this way. I don't mind computers, but I like to see my book (5).....a shelf!
