Match Investigation Terms

Match the following steps of carrying out an investigation with its terms.

Term	Definition
Aim	What you changed.
Independent Variable	What you measured.
Dependent Variable	Reflecting on what you did to make sure the experiment was a fair test.
Control Variables	The section where you explain your results using your scientific knowledge.
Accurate	Things you kept the same to make sure it didn't affect the results, thus making the experiment a fair test.
Reliable	The purpose (reason) of the experiment. You will be able to find the IV and DV here.
Method	A recap of your results to state the trend (pattern) of your data.
Conclusion	The list of instructions on how you carried out your experiment.
Discussion	Reflecting on the quality of your results.
