LIVEWORKSHEETS

Present Simple

Readn and answer the questions.

Earth, our home planet, is a world unlike any other. The third planet from the sun, Earth is the only place in the known universe confirmed to host life.
With a radius of 3,959 miles, Earth is the fifth largest planet in our solar system, and it's the only one known for sure to have liquid water on its surface. Earth is also unique in terms of monikers. Every other solar system planet was named for a Greek or Roman deity, but for at least a thousand years, some cultures have described our world using the Germanic word "earth," which means simply "the ground."

1. For human beings Earth is the only planet confirm to hold:
a. Animals and plants
