HOMEWORK N 2

1. Read this article about the weather in Quito.

Until the 2000s, Quito and Ecuador in general used to have predictable weather in light of the fact that the two constant seasons, summer (also known as dry season) and winter (also known as wet season), never happened at the same time. However, in the last few years, people in Quito don't know what to wear, due to the fact that you never know whether it is going to be chilly or sunny. Regardless of where you are and what the weather looks like, take into account that Quito is still a conservative city; therefore, it is socially acceptable to dress fairly formal and carry a light coat with you. People also say it is a good idea to carry a small umbrella just in case.

2. According to the reading, answer the questions below in complete sentences.

How was the weather in Quito and Ecuador in general back in the 2000s?

How has been the weather lately?

---

3. Write the months to the correct season in Quito

September, May, November, December, January, August, October, July, March, April, June
