MARINE ECOSYSTEMS _ TEST 6

3. Complete

The water in the marine ecosystems has a high level of _____. Light can only penetrate to _____ deep, so most of the _____ live in this top layer. Below this zone, the ocean is so dark that only _____ live there.

4. Classify: (coastal zone, middle zone or deepest zone)

From 1000 m deep to the bottom	
Between 200 and 1000 m deep	
From 0 to 200 m deep	
There is very little light.	
There is no light here.	
There is light.	
Fish in this zone feeds on the remains of organisms that fall from above.	
Plants can't live here.	
Organisms that swim or that are moved by water currents live here.	
Abyssal fish	
Coral	
Whale	

Well done!
