LESSON 4. RENEWABLE AND NONRENEWABLE RESOURCES

Natural resources are renewable or nonrenewable?

Renewable resources are those that can be replaced by a natural process given enough time. For example, soil, water, forest, plants, and animals are all renewable as long as they are used wisely and given the time needed to be re-created, regrown, or reused again.

wind _____

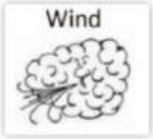
wood _____

oil _____

sunlight _____

water _____

metal ore _____



Renewable	**Nonrenewable**
