LESSON 1-7: USING FORMULAS - DIMENSIONAL ANALYSIS

1) **COOKING** For the chefs to prepare the dishes for the next hour, Adelina needs to provide them with 96 cloves of garlic. However, she can only purchase bags of whole heads of garlic. If each bag of garlic contains 3 heads and each head has about 8 cloves, then how many bags of garlic should she purchase?

Analyze the question and **fill in the blanks**

1 bag = heads

1 head = cloves

Drag and drop

How many bags of garlic Adelina should purchase to get 96 cloves ?

96 cloves × _____ × _____ =

1 bag | 1 head | 8 cloves | 3 head | 4 bags
