Classification

- Drag and drop the correct animal classification.

DOMESTIC	WILD	REPTILE	INSECT

_____ are cold-blooded vertebrates. (Vertebrates have backbones.) They have dry skin covered with scales or bony plates.

_____ have segmented bodies, jointed legs, and external skeletons. They are distinguished by their body, which is divided into three major regions.

_____ may live on a working farm or they may be pets in someone's backyard. Although they are not your typical pet, they can be very affectionate and bond with their humans.

_____ are animals that live or grow in the natural environment; not domesticated.
